Zestimonial

Your best marketing is already written.

Your clients wrote it. Here is how I built an open source tool to collect and publish it.

Swipe →

THE PROBLEM

Testimonials die in inboxes.

- ✕ Chasing clients over email, again
- ✕ Praise buried in DMs and screenshots
- ✕ Copy and paste onto the website by hand
- ✕ No time to turn quotes into posts

01

Collect

Share one link, or send personal requests by email.

Automatic follow-ups on day 3 and day 7, so you never have to nudge twice.

Shareable form

Email requests

Auto reminders

02

Review

Approve or reject every response in one inbox.

Claude picks a short verbatim highlight and tags the topic. You stay in control.

Approve / reject

AI highlight

Topic tags

03

Publish

Embed on any site with a single script tag.

Carousel, grid, masonry, marquee, single card or rating badge. Plus a public Wall of Love.

6 layouts

Wall of Love

1-line embed

04

Export

Turn praise into posts in one click.

Images sized for Instagram, LinkedIn, X and Stories, plus print-ready PDF cards.
